

**ROSLYN MIDDLE SCHOOL**  
**COMPUTER TECHNOLOGY / 8**

Students will be introduced to Photoshop Elements and Macromedia Dreamweaver by way of hands-on activities.

In Photoshop Elements they will learn how to edit, alter, and enhance photographs, textures, clip art, and paintings through unique projects such as creating CD covers, book covers, posters, and collages.

As a culminating project, students will lay out their own web page in Photoshop and use Macromedia Dreamweaver to create their own web pages with tables, hyperlinks, photo albums and commands.
